

PLEASE READ

Legislators are not responsible for the Arbitration award not being funded, and we will need their support to get the award funded in the future.

Legislators did everything in their power late Sunday night to counter the Commissioner's / Administration's tactics.

- 1. We need Legislators' support to fund the Arbitration award, either in a special session or in January.**
- 2. Please make sure every one gets the word and no one attacks the most important people we have in this fight, Legislators.**
- 3. Legislators are human — if, while working to help all of us, they get blamed by one of us, there will be one less Legislator and one less vote in support of funding our Arbitrated award and one less Legislator to stand with us on this issue.**
- 4. If we attack Legislators, the Commissioner wins.**
- 5. The Commissioner and Administration are blaming Legislators. If someone buys into it and goes off on a Legislator, it hurts everyone.**
- 6. The Commissioner played divide and conquer with us when he came into office and failed miserably — we do not want him to be successful playing divide and conquer between us and Legislators.**
